

YARAMALA DHEERAJ GOWD

Computer Science Student — AI & Backend

dheerajgowd777@gmail.com | +91 7013476076 | github.com/dheerajgowd-18 | linkedin.com/in/yaramala-dheeraj-gowd |
Nandyal, AP, India

PROFESSIONAL SUMMARY

Final-year Computer Science student focused on AI and backend engineering. Built a production-style agentic RAG system using LangGraph, Qdrant, and a guardrails layer for safe retrieval, and shipped a hackathon registration platform handling 400+ signups and a client website built end-to-end in HTML/CSS/JavaScript. Comfortable with Python/FastAPI on the backend, growing depth in RAG and LangChain, and uses AI-assisted development tools to move fast on frontend work.

EDUCATION

B.Tech, Computer Science and Engineering — Rajeev Gandhi Memorial College of Engineering & Technology, Nandyal
Expected April 2027 | CGPA: 8.0/10

SKILLS

- **Languages:** Python, JavaScript, SQL
- **Backend:** FastAPI, REST APIs, PostgreSQL, Supabase
- **Frontend:** HTML, CSS, JavaScript (vanilla)
- **AI/LLM:** LLM integration & multi-provider fallback design, RAG pipelines, LangChain fundamentals, prompt engineering
- **Tools:** Git, Vercel, CI/CD fundamentals, AI-assisted development (Cursor, Claude Code, etc.)

PROJECTS

Enterprise Agentic RAG Platform

LangGraph, Qdrant, NeMo Guardrails, Portkey, FastAPI | [GitHub](#)

- Built an agentic RAG workflow using LangGraph, with a guard node for input safety and a planner node that routes each query either directly to response generation or through a retrieval step.
- Implemented a 2-stage retrieval pipeline (Qdrant vector search + FlashRank reranking) and integrated NeMo Guardrails with a Portkey LLM gateway for safety and automatic fallback.

CSE Hackathon Registration Portal

Next.js, Supabase, Tailwind CSS | [Live site](#)

- Built and ran a hackathon registration portal that handled 400+ student registrations.
- Organized the hackathon end-to-end — evaluated problem statements and mentored teams through project selection.

EXPERIENCE

Freelance Web Developer — VNEX WPC (Remote) (May 2026 – Jun 2026)

- Designed, built, and deployed a client website end-to-end in HTML/CSS/JavaScript — from domain/DNS setup through production deployment on Vercel.
- Implemented full SEO: XML sitemap, schema markup, canonical tags, 301 redirect consolidation, Google Search Console submission.

CERTIFICATIONS

Oracle Certified Professional — Generative AI (Jan 2026) • AI Fundamentals, IBM SkillsNetwork (Aug 2025) •
Generative AI Virtual Internship, EduSkills × Google Cloud (Jan 2025)

LEADERSHIP & ACTIVITIES

Founder & Lead Organizer — AI Student Club, RGM CET (2025)

- Founded and led a weekly AI-focused student club with 30–40 consistent attendees.
- Designed and facilitated 40+ hands-on sessions on machine learning, generative AI, and LLM tools.
